Kalamazoo County Juvenile Home Kalamazoo, MI

The Kalamazoo County Juvenile Home is a steel framed facility designed utilizing cellular deck for in floor wire management. The system is fed from the ceiling above. We supplied a boot riser with extensions to exceed ceiling height. The riser is divided to maintain isolation of power and data, and has removable cover plates for accessibility. There is a closure/cap at the top of the conduit feed.

Construction began in July 2007 on the Kalamazoo County Juvenile Home in Kalamazoo, Michigan. The \$28.3 million project will provide secure residential detention housing, education, and treatment services. The new Juvenile home will replace the existing facility on the same site.
