Cordeck System:

N-R-G-FLOR+[®]
In Floor Cellular Raceway System

This three-story, 131,000-square-foot multi-specialty health center features a variety of functions including an urgent care center, space for an extensive network of specialists and primary care physicians, rehabilitation and physical medicine services. Guests also have access to a medically integrated Fitness & Wellness Center, featuring state of the art facilities and equipment, saltwater filtered pools (including a 25-yard lap pool, a therapy pool, and a spa pool), steam rooms, and saunas. This conveniently located center has become a leading health and wellness facility.

Cordeck's In Floor Cellular Raceway System allows for complete design flexibility, permitting Main Line Health Center to stay dynamic with their equipment layout. Our system provides maximum layout options and eliminating tripping hazards because the power and data cables remains directly under the exercise equipment.

Our Innovative In Floor Cellular Raceway is an In-Slab Wire Management System That Delivers Power and Data Where You Need it
